PUT A TITAN TO WORK

Luggage no longer has to be boxy, unoriginal, breakable, hard to pack and even harder to carry around. Titan, the world's premiere luggage brand, is making its official debut into the American market. Until now, Titan's lightweight durable and stylish luggage has been available only in Europe and Asia. With a complete line ranging from beauty and business cases to carry-ons, trolleys and flight bags, Titan luggage is characterized by smooth and efficient lines and practical rolling systems that will allow anyone to travel in style.

True to the German tradition of engineering excellence, Titan luggage embodies three of the latest trends: cutting-edge materials, maneuverability, and bold use of color. Made with 100 percent polycarbonate, these extremely lightweight pieces come with sturdy ergonomic telescopic handles, scratch-resistant materials and protected exterior zippers. All pieces feature integrated TSA-approved locks and removable garment and toiletry bags. Visit www.titanluggageusa.com for more information.
