**consummate  
traveler**

## DURABLE GOODS

Hard-shell bags are coming back in style for their durability and lighter-than-ever materials. Just released in America, the already world-popular luggage line **Titan** has new, boldly colorful, and design-driven cases. **X2** is their most style-conscious line, made of 100% lightweight polycarbonate with ergonomic handles, protected zippers that won't catch on the carousel, a fully lined and padded interior with removable garment and toiletry bags, and a "No Matter What" unconditional lifetime warranty. You won't need to replace it if it wears out, even if you use it to sled down the Matterhorn twenty years from now, they'll repair or replace it. 24", 26", 29" in yellow, gray, champagne, black, or red. \$550-\$650.
